

Mounting Foot Kits

Each Kit Includes

- 2 x Mounting Foot with Aluminium Strut
- Fixings

Product Features

- Available in the following lengths: 400mm, 600mm, and 1000mm
- Made of SBR-Recycled rubber
- Aluminium strut
- Drainage Slots for rainwater run-off
- Flexible Design for late design changes

Our Mounting Foot Kits are a flexible support system designed to accommodate various types of equipment, such as air source heat pumps, air conditioning units, pipework, cable trays, and outdoor equipment.

They are also suitable for mounting solar thermal and solar photovoltaic installations on flat roofs. This support system is made of SBR-Recycled rubber and features an aluminium strut.

Our Mounting Foot Kits provide non-penetrative support and have a flexible design that allows for late design changes. They are suitable for interior or external use in temperatures between -40°C and $+80^{\circ}\text{C}$ and have a dense construction with drainage slots on the underside to allow for rainwater run-off.

Product Code	Description	Safe Working Load*	Length (Each Strut)	Width (Each Strut)	Height (Each Strut)	Weight (Each Strut)
MF-KIT-400	2 X Mounting Foot 400mm Length incl. fixings	480kg	400mm	180mm	95mm	9.5kg
MF-KIT-600	2 X Mounting Foot 600mm Length incl. fixings	900kg	600mm	180mm	95mm	13kg
MF-KIT-1000	2 X Mounting Foot 1000mm Length incl. fixings	1290kg	1000mm	180mm	95mm	21.6kg

Material	Properties
Rubber Casing	The SBR-Recycled rubber used in the compression moulding process is milled, sieved, and graded before being bound using a ratio of high quality moisture curing Polyurethane Pre-Polymer.
Aluminium Strut	41mm x 21mm Aluminium
